

## **Beamglow Ltd**

### **Sustainable Procurement Policy**

Beamglow Ltd recognises that our responsibility extends beyond our own operations. The choices we make when selecting suppliers and partners have a direct impact on our environmental footprint, social responsibility, and long-term business resilience.

#### **Supplier Selection Principles**

- We give preference to suppliers who demonstrate strong sustainability credentials, including:
  - Use of **certified materials** (e.g. FSC-certified paper and board).
  - Low-carbon manufacturing processes and evidence of continuous improvement.
  - Local and regional partners, to minimise transport emissions where feasible.
- Ethical considerations form part of our decision-making process. We will not knowingly engage with suppliers who breach human rights, environmental, or labour standards.

#### **Supplier Assessments and Audits**

- We assess suppliers on their environmental, social, and ethical practices.
- Where possible, we request supporting documentation such as certifications.
- Informal reviews of supplier performance are carried out regularly by our procurement team.
- Suppliers are expected to adhere to the principles of our **Supplier Code of Conduct**.

#### **Carbon and Sustainability Alignment**

- Beamglow's carbon calculator can track the footprint of our products throughout the supply chain. See Macallan case study.
- Procurement decisions are informed by this data, ensuring suppliers align with our goal of reducing emissions and resource use.
- Case studies, such as the Cerruti 1881 VIVO fragrance carton (foil-free Transmet material) and Ghost Fragrance (near carbon-neutral Invercote), highlight how supplier collaboration leads to measurable environmental benefits.

#### **Our Commitment**

Beamglow Ltd is committed to building long-term partnerships with suppliers who share our values of integrity, responsibility, and sustainability. By working together, we can achieve meaningful reductions in carbon emissions, improve material efficiency, and deliver innovative, sustainable packaging solutions.
